# WESTERN GROWN JUMBO ROSES

## GUARANTEED TO LIVE--GROW--AND BLOOM

**GUARANTEED!**

In every sense of the word, our roses are guaranteed. Guaranteed to reach you in good condition, to live, grow, and bloom. These are superior quality Jumbo roses and all that we ask is that you give them the proper care. Always remember that you can **DEPEND ON WOLFE NURSERY**—it will save you money.

We are proud to have these roses to offer to you—they represent America's very finest varieties and they **were not grown** in the area that was hit by freeze in the fall. In our opinion, roses that were in the freeze area were damaged to the extent that they are absolutely not fit to sell. We urge that you **PROTECT YOURSELF**—do not buy dead or damaged roses. No matter who you buy from, inspect your bushes for damage. Be sure you get your money's worth!

Our guarantee indicates the quality of our roses. It is a guarantee that **protects you**. Here is what you will find when you receive Wolfe Nursery's Western Grown Jumbo Roses: A nice green, fresh-looking bush. Strong, heavy canes, and a full fibrous root system. A quality rose that will be a compliment to your yard and source of pleasure to you for years to come.

### PEACE (AARS)

Certainly this All-America Winner for 1946 is one of the most beautiful of all Roses. Perhaps its chief beauty is the great range of colors through which it passes. The full ovoid bud is deep yellow, with the edges of the petals pitted cerise. It slowly opens to a glorious 5-inch bloom with shades of canary-yellow, pale gold, cream, pearly white, and apple blossom. Although the bloom is usually large, double and long-lasting, the dainty coloring gives it marvelous beauty. The plant is just as large and fine as the blooms, being above average in size, and the flowers are borne on long straight stems above the vigorous shining foliage. No such amazing combination of strong stems, fine lasting qualities, and huge, perfectly formed, delicately colored Roses, ever existed before. Plant Pat. No. 591.

# WYANT ROSES *produce satisfaction*

WYANT ROSES are all three-year, field-grown budded bushes of the highest quality. Having been raised in the severe climate of Northern Ohio by Rose Specialists, they will produce satisfaction in your garden if given a chance.

## *Fall-Planted Roses are Best*

Leading rosarians agree that fall is the ideal time to plant Roses. Wintering in the ground is Nature's way and results in earlier and larger blooms and more of them. Our Roses are dug when the season's growth has been completed and they are shipped to you at the proper time—October or November. At this time the soil is usually more mellow and easier to work. You can prepare it when convenient and let lay till plants arrive. Poor soil can be greatly improved by adding up to  $\frac{1}{3}$  peat or humus. Roses like good soil.

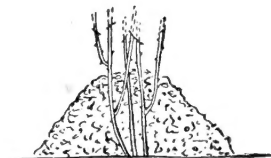

## PLANTING INSTRUCTIONS

Keep the roots moist all the time before planting.

Spread out the roots so they do not crowd; cover them with good soil and firm the earth about them, eliminating all air pockets.

Plant 15 to 18 inches apart, where there is sunshine at least half a day.

Mound soil about 10 inches high *immediately* after planting, to keep the moisture in the branches

Roses banked with earth  
immediately after  
planting

## PREVENT BLACK-SPOT NEXT YEAR— SPRAY ROSE-BEDS THIS FALL

Black-spot lives over winter on diseased leaves that fell to the ground this summer. Help prevent the spread of this disease next spring by disinfecting the soil in and around the Rose-bed. Spray the plants, the ground and the surroundings with lime-sulphur at the rate of 1 pound to 4 gallons of water. Apply it with a sprayer or a sprinkling can the last thing in the fall. At that time remove any leaves still remaining on the plant by stripping them off or pruning down to 15 or 20 inches, thereby cutting them off.

It is well to repeat this lime-sulphur treatment the first thing in the spring before the new leaves come out.
